That looks like a great presentation! After you share with tribe, can we have a copy? Let me maybe put some thoughts together and then we can share with Minnie and see what she thinks! Looks like storm is coming into Utah Monday night into Tuesday, hopefully more rain than snow!!!

Good question Sheila. We've been focused on our Monday meeting with the tribe. We have a ppt. presentation which covers:

- Health effects of air pollution
- Current ozone design values and regulatory monitors
- Timeline of the designation process
- Implications of different classifications (what's involved in SIP/FIP, demonstrating attainment)
- Definition of Uinta Basin airshed for designation purposes
- Winter ozone field studies
- Ozone modeling for NAAQS attainment
- Uinta Basin modeling currently available
- Background ozone
- Where are the emissions coming from?

Kyle Olson also has some slides and will do a hands-on tutorial on how to use AirNow, access data, produce reports, etc ...

Would you like to work together on an agenda this afternoon? I'm here until 4:30 and out tomorrow.

Thanks,

Jody

Jody - just wondering if there is any agenda for Tuesday or just a discussion? Thanks!
